Overview

Extanto Technology has over five years performing content reviews for companies, agencies and organizations. In that time, we have developed a significant body of knowledge pertaining to diversity, equity and inclusion. It is this work that has enabled our partnership with Textmetrics who have created the writing assistant tool.

Extanto represents Textmetrics in the US. The Textmetrics writing assistant tool helps organizations get the most out of their content by applying these checks to your authored materials: brand identification and value, sentiment, your style guide, inclusion (DEI) check, accessibility, gender bias, readability and reading level, and layout, and can translate into 34 languages. Extanto has partnered with Textmetrics to create a DEI-specific module based on the rulesets Extanto has developed. Textmetrics has been in business for 10 years and its tool is in use by more than 60,000 users worldwide.

Extanto's represents Dectron USA to Government clients. Dectron manufactures and distributes modular, industry grade articulating arm systems and workstations designed to meet unique requirements, optimize 5S & lean programs, and outlast office grade competition. Instead of using inferior, office grade equipment in your medical centers, warehouses, and distribution centers, use equipment that is designed to withstand the rigors of those environments. Dectron designs components with modularity in mind so components can be configured to meet unique requirements now and be rapidly reconfigured as needs evolve. Dectron build their equipment in the USA, out of high strength welded steel and solid aluminum, providing a product that outperforms and outlasts comparable office grade equipment, ensuring a maximum ROI on your equipment investment.

Past Performance

Extanto has been in business for 13 years. Founded in Oregon, Extanto works with publishers, universities, and state departments of education:

- Cengage Publishing: currently performing linguistic analysis on existing catalog and upcoming titles for diversity, equity and inclusion concerns; authoring; SME and key personnel recruiting and placement; Previous projects include content engineering; content quality assurance and control specializing in hard sciences including mathematics, biology, chemistry, astronomy, physics, finance, economics, statistics, accounting. \$3,904,715.00
- Pearson Publishing: developed process and rubric for performing linguistic analysis regarding diversity, equity and inclusion concerns on human health and sexuality texts. \$8,863.00
- Macmillan Publishing: performing linguistic analysis on existing catalog and upcoming titles for diversity, equity and inclusion concerns. Previous projects include content quality assurance and control in statistics: \$327,521.00.
- University of Oregon: Center for Teaching and Learning, developed and deployed web-accessible database populated by curriculum design modules intended for teacher literacy education training. \$26,000.00
